Day 1
19/10/2020

Python Assg-1
Mohamraj.S

1. write about interpreter and compiler.

Interpreter:-

An interpreter is a program that executes the source code line by line.

Example:-

```
a=10
b=20
print(a+b)
```

Compiler:-

A compiler converts the entire source code into machine code before execution.

Example:-

C and c++ commonly use compilers.

2 object-oriented programming approach.

oops - Object Oriented programming language approach based on object and classes.

An object represents a real-world entity such as a student, car, bank account, or employees.

A class is a blueprint or template used to create objects.
